PC

The screenshot shows a product page for the "Figure Herrscher of Thunder 1/8 Raiden Mei" from the HOYOVERSE SHOP. The main image displays the figure in its dynamic pose. The price is listed as 750,000 VNĐ. Below the main image is a "Product description" section containing detailed information about the figure, including its origin, material, condition, size, and shipping details. At the bottom, there are four smaller images showing other products: Silver Wing 1/7 Bronya Zaychik, Miss Pink Elf 1/7 Elysia, HONKAI IMPACT 3RD Keyboard theme Elysia, and Art Book Vol-1.

Smartphone

The screenshot shows the same product page for the "Figure Herrscher of Thunder 1/8 Raiden Mei" viewed on a mobile device. The layout is adapted for a smaller screen, with the product image, price, and product description visible. The "Product description" section includes the same detailed information as the PC version. A single large image of the figure is displayed at the bottom.

Conclusion

Figma:

- Helps create a flexible interface model that adapts to many different types of devices.
- The interface can be easily tested and adjusted before moving on to the actual development phase.

Bootstrap:

- A tool that helps build realistic and responsive interfaces for a variety of devices easily.
- Bootstrap helps optimize the development process and ensures that the team's interface will work smoothly on any device.

THANK YOU FOR
